Paid for by Texans For Senator John Cornyn, Inc.

Economy and Jobs

Senator Cornyn advocates a small but efficient government. He believes in low taxes, so the economy can grow and families can decide for themselves how to spend their earnings.

High Energy Prices

Virtually everyone – families, small business and farmers – are reeling from high energy and gas costs. And we're overly dependent on foreign sources. Yet Washington has blocked almost every sensible idea to produce more energy and lower its price. Senator Cornyn believes Washington should get out of the way and allow American ingenuity to develop multiple new energy supplies in an environmentally sensitive way– including renewables like wind and solar, plus nuclear, clean coal, shale, and traditional oil and gas. Congress should not be in the position of blocking 85% of our potential resources.

Restoring Government to the People

Senator Cornyn is an acknowledged national leader on opening up government. He sponsored the biggest overhaul of anti-secrecy laws in 30 years. Washington is beset with charges of corruption and waste, and Senator Cornyn believes that sunshine is the best disinfectant. He is especially critical of the earmark process and its excessive secrecy and wasteful spending.

Health Care Costs and Choices

Senator Cornyn is guided by the simple principle that patients and their doctors should make health care decisions. He has worked to make long-term reforms, not short-term fixes, in national health care policy. He believes in increased transparency, and wants patients to have additional information before making

decisions. He co-sponsored reforms giving self-employed and small businesses the same tax and purchasing power enjoyed by larger companies. He worked for the Medicare Prescription Drug Benefit, saving the average senior \$1,200 a year while allowing seniors to pick the coverage best for their needs. More than a million Texas seniors now benefit from this coverage. He helped secure \$339 million for federally qualified health centers in Texas and more than \$4.5 billion for health care projects across our state.

Keeping Faith With Those Who Serve

National security is Senator Cornyn's top priority. Our troops must have everything they need to win the war on terrorism, and Senator Cornyn has backed every request for support made by our military. He has fought to honor our commitment to those who have served by upgrading veterans benefits and especially our veterans health care system. He advocates better pay, improved housing, and upgraded equipment, training and health care for our troops, our veterans and their families. Senator Cornyn knows we can never do enough for those who put their lives on the line to protect our freedoms.

Opportunity and A College Education

Senator Cornyn believes all Texans deserve a quality education and the opportunity to achieve their potential. He backed reforms to No Child Left Behind to insure that important educational decisions are made by parents and teachers, not by Washington bureaucrats. He co-sponsored the College Cost Reduction and Access Act to increase numbers of Texas Pell Grant recipients and lower the cost of student loans.
